

```

1,2: begin
      if LStyle = 0 then
        TLineSeries(tcs).AddNullXY(x,y, sText)
      else
        TLineSeries(tcs).AddXY(x,y, sText,sColor);
      end;
8,9,10: begin
        if LStyle = 0 then
          TPolarSeries(tcs).AddNullXY(-x,y, SText)
        else
          TPolarSeries(tcs).AddPolar(-x,y, SText,SColor);
        end;
//

```

**This works**

**'AddNull()' yields similar results**

**This doesn't work**

## VCL Version Help & Tutorials

### TChartSeries.AddNull

[TChartSeries](#)

**function** AddNull(Const Value: TChartValue): Integer; **overload;**

#### Unit

[TeEngine](#)

#### Description

The TChartSeries AddNull method can be used to insert new Series Null points when you do not have an X Value for the point.

This function inserts a new empty point in the Series. Series points before and after do not connect across the space left by the Null point.

The function returns the new point position in the Values list.
